Summary

B.E. graduate in Artificial Intelligence & Machine Learning (CGPA 8.59), working as a Full Stack Developer for two companies. I build production web applications with LLM integrations, REST APIs and workflow automation in TypeScript and Python, and ship them for real clients.

Experience

Full Stack Developer – Swan Digital Solutions Current

- Built an **AI virtual trial room** for SDS Tiles & Ceramics: **Google Gemini** analyses a customer's room photo, recommends catalogue tiles and renders the re-tiled room in a before/after view. *React, TypeScript, Supabase, Vercel serverless APIs, Razorpay.*
- Built **SWAN DIGITAL ERP**, an internal business ERP (clients, projects, quotations, invoices, payments, audit log) with a **Python FastAPI** backend. *FastAPI, SQLAlchemy, Alembic, PostgreSQL, React.*
- Built **StoneQuarryERP** for KMG Temple Stones: a multi-business ERP with isolated Supabase portals, row-level security, per-module staff permissions and audit triggers, covering GST billing, stock, trips and reports.
- Delivered two multi-school management systems with role-based logins, attendance, marks, dashboards and PDF report cards. *Next.js 15, Prisma, PostgreSQL.*

Full Stack Developer – Hosting Baba Current

- Building **Grain Bazar**, a multi-vendor marketplace with customer, vendor and admin portals, and **automated order and stock sync to Zoho Inventory and Zoho Books** through webhooks. *TanStack Start, Supabase, PostgreSQL.*
- Built **Jobs in Kolar** and **Driver Hub**, three-portal job platforms (seekers, employers, admin) with Razorpay billing, Realtime updates, Edge Functions, English/Kannada support and installable PWAs.

Projects

ToLetHub – AI-Powered Rental & PG Discovery Platform

- Connects tenants directly with owners to skip broker fees, with a **Gemini-powered AI chat assistant**, Leaflet maps with distance calculation and an owner listing wizard. *Angular, TypeScript, Node.js, Express, MongoDB, Gemini API.*
- github.com/indra9346/TOLET | tolet-iota.vercel.app

Student Data Management System (Java + Hibernate + PostgreSQL)

- CRUD application demonstrating ORM with Hibernate on PostgreSQL. github.com/indra9346/hibernate-crud-demo

DJ Video Editing Services – Client Website (React + Vite + Supabase)

- Responsive website built to a real client's requirements and deployed on Vercel. dj-video-editing-services.vercel.app

Technical Skills

Languages: TypeScript, JavaScript, Python (Intermediate), Java, C, SQL, HTML, CSS

AI & LLMs: Google Gemini API, LLM integration in web apps, AI-assisted development with coding agents (Claude Code, Lovable, Antigravity CLI)

Frameworks: React, Next.js, Angular, Node.js, Express, FastAPI, SQLAlchemy, Prisma, Hibernate, TanStack Query, Tailwind CSS

Data & Cloud: PostgreSQL, Supabase (row-level security, Edge Functions, Realtime), MongoDB, Vercel, Google Cloud

Integrations & Tools: REST APIs, webhooks, Razorpay, Zoho Inventory/Books, Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook

Education

SJC Institute of Technology **2026**
B.E. in Artificial Intelligence & Machine Learning CGPA: 8.59

LRG Naidu JR. College **2022**
PUC (Physics, Chemistry, Mathematics) 85.3%

LRG Vidyalayam (EM) **2020**
SSLC 78.5%

Certifications & Achievements

- Google Cloud Skills Boost: multiple hands-on cloud badges; advanced from Silver League to Gold League (skills.google/public_profiles/18bad5eb-bfc2-4f59-b0a9-2546e0d921bb). Mastering DSA with Java (in progress).
